SESSION 1 (2:00-2:30 p.m.)

Room 1:

Kacie	Dunham	Neural Responses to Audiovisual Speech in Infants at Increased Likelihood for Autism and Links with Language: An ERP Pilot Study
Lana	Jeradeh Boursoulian	The recurrence rate of first nonfebrile seizure in pediatric patients with Autism Spectrum Disorder
Chase	Mackey	Sustained changes in electrophysiological and behavioral measures of spatial processing in a macaque model of cochlear synaptopathy
Sarah	Vassall	Rethinking the McGurk Effect in autism: hierarchical drift diffusion modeling reveals decision-making differences in autistic and neurotypical children and adolescents

Room 2:

Jacob	Feldman	Multisensory Perceptual Training in Autistic Youth: A Randomized Controlled Trial
Jessica	Feller	A Timecourse of Temporal Processing in a Nonhuman Primate Model of Cochlear Synaptopathy
Nisha	Mailapur	Remote-Microphone Systems for Youth with and without Autism: Effect on Protesting and On-Task Behaviors
Adriana	Schoenhaut	Effects of Motion Coherence and Congruence on Sensory Cue Weighting for Dynamic Audiovisual Integration

Room 3:

Rachel	Calvosa	Relationship Between Parent-Reported Anxiety and Parent-Reported Sensory Sensitivity in Females With and Without Autism Spectrum Disorder (ASD)
Jessica	Thomas	Impact of bedding material on tactile behavioral phenotypes of a Camk2a E183V mutant mouse model of ASD
Alisa	Zoltowski	A Pilot Study of Active Social Touch in Autism

Room 4:

Camila	Alviar	Hierarchical Acoustic Structure During Parent-Child Interactions of Toddlers with Typical Development and Autism Spectrum Disorder
Grace	Pulliam	Audiovisual Multisensory Integration in Individuals with Reading and Language Impairments: a Meta-Analysis
Elizabeth	Rossi	Examination of IEP literacy goals for students with complex communication needs
Mercedes	Spencer	The contributions of working memory and cognitive flexibility to reading comprehension performance in elementary-aged children
