SESSION 2 - 2:30-3:00 p.m.**Room 1:**

James	Bauer	Hyperactivity of ventral hippocampal mossy cells degrades dorsal hippocampal mnemonic function via longitudinal projections
Randolph	Dupont	Cortical Volume Heterogeneity in Children with Psychopathology
Laura	Geben	Mapping the Time Course of mTORC1-Driven Tumorigenesis in the Developing Brain
Amanda	Marino	Acute and short-term behavioral deficits following mild traumatic brain injury in a mouse model of Vitamin C depletion
Saramati	Narasimhan	Differences Between Left and Right Mesial Temporal Lobe Epilepsy Using Resting-State Network fMRI and SEEG Connectivity

Room 2:

Matthew	Anguiano	Investigating Relation between Behavioral Responses to Social Evaluative Threat in Adolescents with and without ASD
Eman	Durrani	Involuntary job loss among autistic adults: Frequency and self-reported reasons for being fired
Rachael	Muscattello	Elevated Morning Testosterone Levels in Prepubertal Adolescents as a Potential Indicator of Early Pubertal Onset in Autism Spectrum Disorder (ASD)
Jennifer	Quinde	Identifying and Describing Subtypes of Spontaneous Empathic Facial Expression Production in Autistic Adults
Zachary	Williams	Investigating the Phenomenology of Decreased Sound Tolerance in Autistic Adults

Room 3:

Allyson	Arserio	The Experiences of Parents and their Young Children in Accessing and Learning How to Use a Speech-Generating Device
Mary Chapman	Miller	Use of Salivary Cortisol to Measure Stress in Children with Advanced Cancer Undergoing Animal-Assisted Interactions
Becca	Richardson	Language Assessment Knowledge and Practices of School-Based SLPs
Lauren	Zaylskie	AAC in the PICU: Supporting children with complex communication needs in the PICU

Room 4:

Aditi	Buch	Understanding the effects of genetically increasing mGlu7 expression in Rett Syndrome model mice
Bridget	Collins	Safety and efficacy of genetic MECP2 supplementation in the R294X mouse model of Rett syndrome
Hongwei	Dong	Potentiation of mGlu7 rescues neurophysiological features in a mouse model of Rett Syndrome
Michelle	Piazza	Evaluation of the therapeutic potential of ketamine in Rett syndrome and the role of brain derived neurotrophic factor (BDNF)

Room 5:

Sophia	Kaiser	Correlations Between Parent Linguistic Responsiveness and Later Communication Outcomes in Infants: A Proposed Study
Jonathan	Liu	Parent-Child Integrated Music Program Supports Well-Being in Families of Young Children with and without ASD
Aparna	Srinivasan	The use of blink timing as a prosodic communicative marker in infant-directed singing interactions
Virginia	Sullivan	Associations Between Parental Depression, Parental Coping Style, and Depressive Symptoms Among Transition-Aged Autistic Youth
